

Exploring Northeastern North Carolina's Early Architecture and Maps

January 18, 2014 ♦ 10:00 am - 4:00 pm

9:30 - 10:00 am ♦ Registration and Coffee

10:00 am ♦ Reid Thomas, Restoration Specialist, NC State Historic Preservation Office

Exploring Northeastern North Carolina's Early Architecture

An illustrated survey of regional buildings from the recently discovered oldest dated house to ones built up to about 1840 will be presented. Several fascinating buildings (from humble one-room abodes to finer multi-room houses) that have been studied over the last 20+ years will be highlighted.

12:00 - 1:00 pm ♦ Lunch

1:00 pm ♦ Jay Lester, Independent Scholar, Chapel Hill, NC

To David Stone and Peter Brown, Esq.: this first actual survey of the state of North Carolina taken by the subscribers is respectfully dedicated: The Story of the Price-Strother Map

The 1808 Price-Strother map of North Carolina, published with the financial backing of David Stone, was the first map of the State by actual survey. A review of the map was published in 1964 in the North Carolina Historical Review. Through many hours spent in archives, libraries, and on line, a greatly expanded and corrected history of the map is now pending publication in the MESDA Journal.

2:30 pm ♦ Dale Loberger, Historic Interpreter, Monroe, NC

Hands-on demonstration of surveying equipment of the late eighteenth and early nineteenth century.

Advances in science and the demands of a developing continent led to rapid growth of tools and techniques for describing physical geography and bringing order to the untamed world. Learn through experience how early maps were created from the instruments devised to measure and plan the future of a new world.
